

Safe Line Telephone Analyzer & Tap Deactivator SL-100

The SL-100 offers 6 levels of protection against eavesdropping attempts, more than any other device of its kind. Whether you are on or off the phone, line voltages are constantly monitored and displayed, alerting you to almost any type of bugging device on your line. In addition, taps are neutralized or deactivated for the highest level of privacy protection. Even voice activated systems are rendered useless by the SL-100 Anti-VOX system.

Specifications:

Digital display to reflect line voltage changes

Automatically deactivates most wire-tapping devices

Combats crystal line transmitters by shifting their frequencies

Tricks voltage sensing recorders

Anti-VOX system fills voice activated recording systems with simulated noise

Instant alert to extension eavesdroppers

Fully line powered requires no batteries or AC adapter

Easy installation

Comes in hard shell black case.

Size: 4 7/8 x 3 5/8 x 1 1/8
