Cellphone Holder Hidden Camera (Item: DVR276)

Need surveillance in your car, truck, van or RV? Keep track of anyone inside ANY vehicle type. Our Cellphone Holder Hidden Camera (DVR276) is the best choice for covert surveillance in anything with wheels!

Features:

Hidden camera for a car with Night Vision and HD recording.

This high quality covert camera looks and works like a commonly purchased automobile cell phone holder. What makes it even better is that it mounts on your dash - the perfect location in your car to capture the highest quality covert video footage you need! Just how high quality is the covert video camera recording? 1080P to be exact!

There are endless reasons why one might need covert surveillance in a vehicle. Need to find out if your partner or spouse is cheating? Worried about your teen driver texting or doing other distracting things in the car? It's easy to get high definition video of your precious cargo into the hands of the person who needs it by mounting this hidden camera right on your vehicle's dash.

- High Resolution 1280x1080 at 30 FPS
- IR's for Night vision recording
- Nearly undetectable
- 66° Angle of View to capture almost any event
- Continuous or motion recording option
- Easy LED indicator lights for set up
- Time and Date Stamp Overlay on the video for evidence recording
- Easy mounting with included suction cup mounting bracket, there is even a second decoy device included so when you have to take this one out you have a replacement cradle.
- Download the video to your PC or Mac to see recording video or snapshots
- **LawMate part number PV-PH10**

What better way to get the highest quality, covert video footage you need, than to have a hidden camera mounted on your dashboard!
HIDDEN IN PLAIN SIGHT!

Best uses: Driver behavior, Teen driving, Taxi, Theft issue, Worried about vandals, and Law Enforcement
