Wi-Fi Smart Home Doorbell Camera (Item: SH1000)

Covert security comes to your front door with our Wi-Fi Smart Home Doorbell Camera. Our battery operated Wi-Fi doorbell camera will alert you on your free smart phone or tablet app with a picture as soon as someone rings your door bell. Doesn't matter if you are home or away! Never answer the door to a stranger again.

Features:

Whether you're at home or away this perfect DIY smart door bell alerts you when a visitor rings the bell. This smart home device comes packed with features:

- Easy to install no wires just stick it and forget it
- Battery operated 2 AAA for up to one year
- Sends pictures right to your phone or tablet so you know who is at the door
- Easy to use App install Eye4 from the app store for free
- Set up is a breeze
- Never offline using WiFi and RF transmission
- Visitor records will be stored free on the Cloud for review anytime
- Equipped with Night Vision
- Anti-theft alarm - if the doorbell was stolen the device would sound an alarm using the door chime (indoor device)

Now you can know who's on your front steps when you're away and the kids are home alone. This is also a great solution for an elderly loved one or someone who may be vulnerable to solicitors, intruders

Cameras and DVRs

or anyone who is unwelcome. Because it's Wi-Fi + RF transmission, it's always connected... never off-line.
