

Audio Security

288 Hour USB Voice Recorder (Item: D1435)

With our D1435 USB Voice Recorder you can capture recordings of your favorite lectures, business meetings, concerts or interviews. Or capture voice recordings needed for an investigation. Never miss a word with this recorder that captures crystal clear audio within a 30 foot area. This USB Voice Recorder records 24 hours of continuous voice or stands by for up to 25 days.

Features:

Compact USB Recording makes it easy to capture crystal clear audio on the go!

The D1435 USB recorder comes with 8GB of storage and holds up to 288 hours of recordings without having to download the data. Keep all your important files with you wherever you go. The audio recorder will stamp time and date right on the file so you know exactly when that important file was recorded. Then, when you need it, you can easily locate the file. Make sure you always stay on top of the important moment with our USB Voice recorder.
