## Mini PTZ Wi-Fi Camera (Item: SH1300)

Just Pan... Tilt... Zoom... Relax with this handy WI-FI PTZ camera (SH1300). This PTZ camera is an easy to set up and low-cost solution for your home or business surveillance needs. It can be used during the day or at night utilizing the built in night vision. The SH1300 pans, tilts and zooms right from the included VSmaHome app and is monitored and controlled remotely. Get notifications via Wi-Fi no matter where you are when someone is in the area of the camera. This motion activated camera is surrounded by 2 IR's and 1 light sensor, giving you the best motion activation technology around. Once motion is detected, you immediately get a notification on your smart phone or tablet.

## Features:

**Pinch and swipe to control the camera right from the app. The incredible features of this camera make the SH1300 perfect for home and business surveillance, law enforcement, natural disaster evaluation, event management, remote monitoring, construction management, or other situations where a camera is safer and more practical than a person.**

- WI-FI/3G/4G and ethernet connection for remote monitoring and real time viewing and PTX control from anywhere Via our free APP VSmarHome
- Observe what is happening in real time from remote locations
- Video in 720P
- Night Vision
- Motion detection notification
- Pan, Tilt or Zoom in right from the app to get a better view of any specific area
- Speak with people (or pets) in the viewing area or hear what is happening with two way talk
- Store Video on micro SD card up to 128GB and playback from the App
- Time and date stamp
- Schedule Alerts enables you to specify the days and times of the week when you want to receive alerts. An alert would be triggered based on detected motion. At times when you do not expect there to be movement around your home or office, you may wish to schedule an alert.
- Scheduled Recording gives you control over the times that you actually record by scheduling a specific times. You will be able to schedule up to four different recording sessions.
- Website browser or PC client available

**Start living the smart home life with this easy DIY**
