VPC Pole Camera (Item: VPC)

Our VPC video Pole Camera System Kit is a great solution for portable, DIY and professional inspection of hard to reach spaces. The flexible hose-like telescopic pole design allows for tough angle adjustments and gives you 360-degree access in almost any difficult-to-see location or a 120-degree ultra wide view using the wide-angle lens option. Once you've reached your desired camera location, you can watch the inspection in crystal clear HD video footage on the included 7 inch LCD Screen.

Features:

Inspect drop ceilings plus look behind immovable objects and around corners. Difficult to reach areas, even in the dark and at night, are a snap thanks to the infrared sensors on board. The camera is waterproof and made of stainless steel for durability and longevity.

Features:

- HD Video Display
- Small 360 degrees flexible Camera Head with 120-degree wide-angle lens. Allows for searches around corner and blind spots
- High Quality 5MP, IP68 Waterproof, stainless steel camera head
- Auto LED Lights for Night Vision and Dark Spaces
- Comes with high-grade aluminum case
- Video records to Memory Card | Supports up to 32G
- Overall Dimensions: 92" Extended | 64" Collapsed | 22" Flexible Camera Head

The VPC is widely used in life searches, anti-terrorism situations and natural disasters like earthquakes.
