DIY Kit - 4K P2P Pinhole Button Hidden Camera + Extended Battery (Item: DIY100EB)

Hidden Cameras come in all forms, but sometimes you need a really particular form to fit your environment. That's where your imagination and the DIY Kit (DIY100EB) collide! With the DIY100EB kit you can transform any household item into a hidden camera.

Features:

DIYers have an amazing imagination. This DIY Kit allows you to flex your creative mind and turn any ordinary business or household object into a hidden camera. The wireless 1080P pinhole button hidden camera can be powered by an internal battery with one hour of battery life or plugged in via USB. The compact design gives this camera the option to be built into wearable surveillance items, the kit comes standard button/bolt accessories to help blend into it's environment. This DIY kit comes with an auxiliary battery to keep your hidden camera charged longer.

FEATURES:

- Recording Resolution: 1080P
- Video Resolution live view 4K P2P only
- Playback in App Resolution 4k|2K|1080P|720P
- Body Worn
- Make your own hidden camera
- Internal antenna
- Motion Activated
- P2P
- Continuous Recording: 1 Hour
- Memory Card: Up to 128GB
- Android & iOS Compatible
- Windows & Mac OS X Compatible
- Extended Li-ion Battery Pack
 - Up to 18 Hours of Continuous Power
 - DC 5V, 1000 mA Input/Output
 - USB 2.0 Cable

If extended recording time is important we recommend utilizing the auxiliary battery pack to keep the video feed recording longer.

Note: This is a battery operated device. If the area in which the DIY100EB kit is installed sees a lot of activity, causing the camera to power on and off frequently, your battery will run down quickly. Be prepared for frequent charges. Battery Operated Cameras are extremely convenient, portable and have endless adaptability. However, depending on the operation, traffic and timeframe an auxiliary battery will most likely be needed to stay operational for

Cameras and DVRs

longer periods of time. The rechargeable auxiliary battery pack + USB adapter included with the DIY100EB produces up to 18 Hours of continuous recording for the wireless hidden camera system. To keep an around-the-clock hidden video feed build your hidden camera near, or plug in to, a power source.
