DIY 4K P2P Pinhole Button Hidden Camera (Item: DIY100)

Need your hidden camera to fit inside an object that's particular to your business or home environment? Then the DIY100 is the hidden camera that's as flexible as your imagination. Turn any household item into a hidden video device with this pinhole 1080P hidden camera.

Features:

Need a hidden camera in a plastic cactus or a pet food bowl or a stuffed singing trout? This DIY 1080P Pinhole Wireless Button Hidden Camera will get the creative wheels turning, helping you transform any object into a hidden camera. This little camera streams high quality video up to 4K, records video at 1080P to save space on the memory card, also use as a body worn button camera set.

FEATURES:

- Recording Resolution: 1080P
- Video Resolution live view 4K P2P only no remote view
- Playback in App Resolution 4k|2K|1080P|720P
- Body Worn
- Make your own hidden camera
- Internal antenna
- Motion Activated
- P2P
- Continuous Recording: 1 Hour
- Memory Card: Up to 128GB
- Android & iOS Compatible
- Windows & Mac OS X Compatible

If one hour of battery life isn't long enough for your newly created hidden camera then we recommend the [DIY100EB kit](#). It includes an auxiliary battery to extend your hidden video recording for hours.

Note: This is a battery operated device. If the area in which the DIY100 is installed sees a lot of activity, causing the camera to power on and off frequently, your battery will run down quickly. Be prepared for frequent charges. Battery Operated Cameras are extremely convenient, portable and have endless adaptability. However, depending on the operation, traffic and timeframe an auxiliary battery will most likely be needed to stay operational for longer periods of time. The rechargeable auxiliary battery pack + USB adapter ([DIY100EB purchased separately](#)) produces up to 18 Hours of continuous recording for the wireless hidden camera system.
