

Tracking Devices

SilverCloud® Overdrive Live GPS Tracker (Item: GPS803)

The SilverCloud Overdrive is the ultimate battery operated Real-Time Tracking Device. With more power than other models and no need for additional cases or extended battery packs, the Overdrive is the clear choice when battery life is the most significant concern.

Features:

SilverCloud App available on:

The web-based SilverCloud® Online mapping software also provides a wealth of useful features, such as:

- Super-fast location by location updates, with the ability to update every 3 second.
- Original SilverCloud design, only bigger and with more battery power.
- SilverCloud online mapping interface for smartphones and tablets.
- ShareSpot which allows users to share their GPS location with anyone through a self-destructing link.
- SilverCloud Alerts sent via text will indicate speed, low-battery, arrival and departure.
- Geo-Fencing
- Routing Utility, which offers users the ability to send real-time directions to the drivers mobile phone via text message.
- Unlimited driver history storage.
- Simultaneous side by side 2D and 3D satellite mapping powered by Google Maps.
