

Quick Setup Guide For Zone Shield® DVR

Full Manual Located on included CD

1. Take out the Zone Shield® unit and plug it into any available wall outlet for power.
2. Facing the back of the unit locate the *Video-Out Jack* (see full manual to locate). Using the included *Video Cable* plug the cable into the *Video-Out Jack*. Connect the other end of the *Video Cable* to a Television video input jack.
3. Change the video input or auxiliary on your TV. The input select button is usually located on the TV's remote control or on the front panel of the TV itself. However, some TV's may require you to select the video input from the on-screen menu. Consult the owner's manual for specific instructions.
4. When you have a picture on your Television use the included remote and press the *Menu* button to enter menu screen. (see diagram for remote functions on page 7 of manual)
5. Set up Time and Date using the enclosed remote. Go to Main Menu> Date/Time Setup (see page 7 of manual) then return to the main menu.
6. Find the SD card slot (see full manual) and insert the SD card.
7. Place the unit in the desired location for video surveillance. Factory default settings will record 24x7 using motion detection.
